Daily distillation of the Greek-press cycle — July 24, 2026

The Friday read (on Thursday 23 Jul's close): the bank-led rally FULLY REVERSED — Athens -2.02% to 2,456 — as Brent broke \$100 and the oil shock dragged Europe down; the decoupling is over, oil is the master. The General Index CLOSED 2,456.16 (-2.02%, intraday low 2,433), back below 2,500 after the 21-22 Jul bank-led rally to 2,506.79. The engine of the reversal was the same **BANKS** that led up: **Eurobank -3.0% (€4.25)**, **Alpha -3.3% (€3.916)**, **Piraeus -2.5% (€9.19)**, **NBG -1.7% (€15.20)** — giving back the rally on the oil-inflation / ECB-hike repricing (Lagarde hinting a September hike). But the **REFINERS CUSHIONED** — **Motor Oil +2.3% (€49.82, near a record)**, **HELLENiQ +0.6% (€12.54)** — green against the tape, the domestic beneficiaries of Brent >\$100; cyclical led down (Coca-Cola HBC -3%, Lamda, Titan, Jumbo, Metlen). The **DECOUPLING has fully REVERSED**: oil is now the near-term master, dragging Greece down with Europe (STOXX 600 -1.3%, energy the only sector up). On the capital market, **Aktor's €650m SCI priced €11.25** (oversubscribed ~3.6x — BlackRock, Blackstone, Norges, OMERS; lists 28 Jul). Politics still cuts ND's way: Mitsotakis's September ΔΕΘ >€2bn package (spring-2027), the EPPO OPEKEPE probe BOUNDED (22 suspects incl. 4 ND MPs; no cabinet/PM reach); newest poll **Interview (21 Jul, raw) ND 26.8 / ELAS 15.8 / PASOK 10.1**, ND +11. The domestic re-rating (H1 bank results 29-31 Jul) is the medium-term anchor; **oil is the near-term master. Carryover into today (24 Jul)**: US/European futures are BID (+0.2-0.5%, GOOG +0.84% pre-market — the Alphabet 'ROI-wobble-not-a-top' read reasserting), so Athens may see a relief bounce — but with Brent still >\$100 the banks stay pinned and the refiners the cleaner long until oil stabilises. See the monitor overleaf.

SYNTHESIS · STRATEGIC READ

The strategic read — the rally reversed: oil broke \$100 and Greece re-coupled to the global risk-off.

- **(i) The bank-led rally gave it all back on oil.** The 21-22 Jul breakout to 2,506 reversed to **2,456 (-2.02%)** on 23 Jul as Brent broke \$100 and Europe sold off. The same **BANKS** that led up led down — **Eurobank -3.0%, Alpha -3.3%, Piraeus -2.5%, NBG -1.7%** — giving back the re-rating on the oil-inflation / ECB-hike repricing (Lagarde hinting a September hike). The demand-side H1 catalyst (results 29-31 Jul) is intact medium-term, but it is no longer the driver: oil is.
- **(ii) The DECOUPLING fully REVERSED — and the REFINERS are the tell.** While Athens rallied through the US AI-chop last week, once oil broke \$100 and dragged Europe down (STOXX 600 -1.3%, energy the only sector up), Greece **re-coupled**: banks and cyclical led down (Coca-Cola HBC -3%, Lamda, Titan, Jumbo, Metlen), while the **REFINERS CUSHIONED — Motor Oil +2.3% (near a record), HELLENiQ +0.6%** — the domestic beneficiaries of Brent >\$100. The re-rating is not broken, but it is hostage to the oil shock near-term; the refiners are the one clean long into it.
- **(iii) Aktor's €650m SCI PRICED — orderly, on deep demand.** The year's largest ATHEX raise priced at **€11.25** (the range cut from a €13.52 ceiling to €11.25-12); the listed share fell ~14% (13.02 -> 11.72) converging on the clearing price — an **ORDERLY** ex-rights dilution, **NOT** distress: demand ran **3.5-4x / €2.3bn** (Blackstone, BlackRock, Mystakidis, Melissanidis), €650m raised (no upsize), 57.78m new shares list 28 Jul, a €300m bond leg alongside (~€1bn for the ~€3bn 2026-31 plan). The size cleared to top-tier foreign institutions — the deepening-capital-market thesis, at a cyclical price.
- **Net (Delphic view):** the medium-term re-rating (H1 bank results, Fitch BBB, the capital-formation cycle) is intact — but near-term the tape is **HOSTAGE** to the oil shock: with Brent >\$100 and Europe in a stagflation-tinged risk-off, Greece re-couples, the banks/cyclical the drag and the refiners the one clean long. Watch for oil to stabilise + the 29-31 Jul H1 results to re-anchor.
- **(iv) Politics — both threads still cut the government's way.** Mitsotakis will roll the ND pre-election programme at the September ΔΕΘ (aimed at spring 2027) with a >€2bn TIF package; the EPPO OPEKEPE probe stays **BOUNDED** (22 suspects incl. 4 sitting ND MPs charged 16 Jul; no new procedural vote, no cabinet/PM reach). The newest poll — Interview (21 Jul, raw) ND 26.8 / ELAS 15.8 / PASOK 10.1, ND +11 — keeps ND in the high-20s cluster; base case an ND-LED government.

CATALYST WATCH

ADDITIONAL SIGNALS (not in the read above)

- Corporate — the energy-infrastructure consolidation rolls on regardless: Aktor's 50% Dioryga Gas FSRU deal (~€400m); the VOAK/Diktaean structure (GEK Terna / Aktor / Metlen); the EU-cleared DEI-Metlen ~1.5 GW storage JV. Analyst PTs firming (Axia: Piraeus €10.60; Optima: HELLENiQ Buy €12.90; Pantelakis: Motor Oil €51.20) — a discount-to-peers story into H1 results.
- Politics — the autumn roadmap: a ~€1.5-2bn September ΔΕΘ package + a fresh 5-part housing package (14 Jul). GPO (13 Jul) likely the LAST clean read before the August blackout.

Into the week

- Corporate — AKTOR's €650m SCI is the week's MAJOR event: the book was covered in ~30 minutes Monday (foreign-institution-led) — watch the FINAL pricing, a probable UPSIZE, and the €300m bond leg of the ~€1bn / ~€3bn-plan raise. ELHA's ~€250m SCI results are due 21 Jul (new shares list 22 Jul). Lamda redeems its old €320m bond 21 Jul. The read on primary DEPTH: Aktor's 30-min coverage says demand is absorbing the pipeline.
- Markets — whether the consolidation deepens or bases: watch the supply pipeline clear and whether fresh hands hold the discounted stock through the global risk-off; the H1 bank-results cluster (29-31 Jul, NII-guidance lifts) is the demand-side catalyst to break the range.
- US — the AI/momentum de-rating climbed the quality ladder (a mega-cap leader cracking, Google -4.4%; semis down again, Micron -5.7%, AMD -5.3%; the S&P; -0.5% to ~7,507); the GGB and Greek duration lean on the US rate path — watch the bank-earnings run and Fed messaging.
- Politics — ~50% expect early elections; GPO (13 Jul) likely the LAST major clean read before the August blackout. Watch the pre-ΔΕΘ bidding war (govt ~€1.5-2bn vs the opposition's 'τζ■μπα 1 & 2') and any Samaras-launch signal (expected early Sept).
- Foreign — the F-35 / Turkey file: an S-400 sale to a Gulf buyer remains UNCONFIRMED. The live front is the US Congress fight (Rep. Titus's House letter opposing F-35 to Turkey) after the Trump-Erdo■an Ankara summit. A real but slow tail (Greek F-35s from late 2028).

Politics — the 2027 election-cycle watch

POLITICAL MONITOR · GREECE 2027 CYCLE

The field keeps consolidating around ND vs a Tsipras-led #2 — our own view, not the papers'. Newest print GPO (13 Jul): ND 29.3, ELAS 16.6, PASOK 10.8, Greek Solution 9.1, KKE 9.1, Elpida (Karystianou) 7.0 — a ~13-pt ND lead, government disapproval ~68.6% the cost-of-living cap. It slots into the ~29-30 cluster and confirms the SHAPE — **ELAS a clear #2, SYRIZA collapsed (~1-2), the anti-ELAS left fragmenting**. We form the view: the 'ND bled 10 points' reflex is too quick — in 2023 ND polled ~30 and TOOK 40.6% (shy-ND + late useful-vote), so high-20s/30 is a FLOOR and much of the 'missing' is parked-undecided that reverts. The left's fragmentation empties the anti-ELAS home — consolidating Tsipras #2, wasting left vote sub-3%, LOWERING ND's bar to 151. **Base case unchanged: an ND-LED government**, via the reinforced-PR repeat consolidating the shy-ND vote (2023 template) and/or a post-round-1 PASOK splinter — not a static whole-PASOK tie-up (ruled out by both sides). The genuine risk is if neither fires. Watch: ND off its floor, the ELAS-PASOK gap, SYRIZA's crunch, the Samaras-party question (rejected by ~79% of voters; launch expected early Sept).

VOTE INTENTION — LATEST PRINTS (% ESTIMATE / εκτίμηση)

DATE	POLLSTER	ND	ELAS	PASOK	ELPIDA	GR.SOL	KKE
13 Jul	GPO (iefimerida) — NEWEST	29.3	16.6	10.8	-	9.1	9.1

1 Jul	MARC (est.)	30.5	16.5	10.5	10.5	-	-

Figures are the ESTIMATED outcome (εκτίμηση / undecided-allocated). MRB (9 Jul, semi-annual): the εκτίμηση is ND 29.0 / ELAS 17.6 / PASOK 11.1 (the RAW προθέση is ND 23.8 / ELAS 14.4 — a 9.4-pt gap that widens to 11.4 on the estimate); Prorata publishes RAW only and is excluded. Houses diverge on the ND topline (Alco ~25 vs Pulse/Metron/MRB/MARC ~29-30) but AGREE the structure: **ELAS a clear #2** (~15-18), PASOK contesting #3 (~10-12), **SYRIZA collapsed** (~1-2). SEAT estimate at ~30% ND ≈ ~120 (short of 151) → a coalition/route-to-majority required. 2023 result for reference: ND 40.6, PASOK 11.8, KKE 7.7. Series: geopolitics/greece-2027/inputs/polling.yaml.

TOP SIGNALS · 21-23 JUL

- **BANK-LED BREAKOUT** — the General Index RALLIED +2.08% on 21 Jul (back above 2,500) then a third straight gain to **2,506.79** (+0.24%, 22 Jul), near the 17-yr high. The engine was the BANKS: **Eurobank +6.2%, Piraeus +5.6%, Alpha +4.7%, NBG +3.5%** on 21 Jul — a franchise re-rating running ahead of the H1 results (Piraeus opens 29 Jul; MS/Citi constructive). Athens rallied while the US chopped and oil broke \$95 — the domestic re-rating DECOUPLED.
- **AKTOR €650m SCI PRICED at €11.25** — the range CUT from a €13.52 ceiling to €11.25-12; the listed share fell ~14% (€13.02 → €11.72) converging on the clearing price. But ORDERLY, not distress: demand ran 3.5-4x / €2.3bn (Blackstone, BlackRock, Mystakidis, Melissanidis), €650m raised (NO upside), 57.78m new shares list 28 Jul, a €300m bond leg alongside (~€1bn for the ~€3bn 2026-31 plan).
- **NEWEST POLL** — Interview (published 21 Jul) supersedes GPO: **ND 26.8, ELAS/Tsipras 15.8, PASOK 10.1**, Greek Solution 8.9, KKE 5.9, Elpida/Karystianou 5.3, MeRA25 3.1, Plefsi 2.9 — ND +11. CAVEAT: Interview's figures are προθέση ψήφου (RAW vote-intention); no separate εκτίμηση table was published, so do NOT read these as the allocated estimate (which typically widens the ND lead).
- **MITOTAKIS' 20 JUL PARLIAMENTARY-GROUP SPEECH** — the PM fixed the electoral clock at **spring 2027** (killing the early-election talk for now), framed the ΔΕΘ/TIF as a 'credibility test', mounted a **full defence of the four OPEKEPE-charged MPs** (claiming vindication and 'no cover-up'), and hammered PASOK and Tsipras. Reads as a government going on the front foot, not managing a scandal.
- **OPEKEPE / EPPO — SHARPER IN SPECIFICITY, STILL BOUNDED IN SCOPE**. The 16 Jul EPPO indictment named **22 suspects, incl. four sitting ND MPs (Skrekas, Papakosta, Boukoros, Senetakis) + a former minister**; but **7 of 11 immunity requests were archived**, the offences **prescribe in September**, and there is **no cabinet/PM reach**. The opposition (20 Jul) escalated the rhetoric — PASOK calls it a 'blue (γαλάζιο) scandal', SYRIZA/KKE 'αριστέα στην ανευθυνότητα' — but the legal perimeter has not widened toward the government. Our read: bounded, as pre-sold.
- **GOVERNMENT U-TURN (20 Jul)** — the MP/minister incompatibility (ασυμβατότητα) proposal was SHELVED, a small tactical retreat under opposition pressure; a process concession, not a substantive one.
- **ΔΕΘ/TIF PACKAGE SHARPENED** to ~€2bn — child benefit +30%, **τεκμαρτο/προκαταβολή** (deemed-income / advance-tax) cuts, abolition of the **τάλος επιτηδεύματος** (trade levy), and pensioner support; amount + mix now firmer, locked for the early-September Thessaloniki Fair speech (with the election-timing signal expected the same day).
- **GPO (13 Jul, for iefimerida)** remains the NEWEST print — ND 29.3, ELAS 16.6, PASOK 10.8, Greek Solution 9.1, KKE 9.1, Elpida 7.0; government disapproval ~68.6%. Likely the LAST major clean read before the August blackout. Corroborates the ND floor (~29-30) and the SHAPE (ELAS #2, SYRIZA collapsed); Mitsotakis the clear top-PM.
- **MRB (9 Jul, the semi-annual wave)** corroborates the dipole — εκτίμηση ND 29.0 / ELAS 17.6 / PASOK 11.1 / Elpida 8.8 / Greek Solution 8.7 / KKE 7.3, an 11.4-pt ND lead (the RAW προθέση is ND 23.8 / ELAS 14.4). The headline reads: 69.5% want a change of government, yet Mitsotakis is the most-suitable-PM, and 64% would NOT vote a Samaras party. 'ND and ELAS form a new dipole', PASOK third, Karystianou's Elpida fourth.

- **ΔΕΘ PACKAGE SIZE DRIFTING UP** — the '€1bn' is now the floor; the economic team (Pierrakakis, Nat. Economy & Finance) sees room for €1.5-2bn (iefimerida frames overall ~€2bn, doubled from last year's €1.76bn); amount + mix 'still being finalised', announced at the Thessaloniki Fair 5-6 Sept with an election-date signal expected the same speech.
- **PENSION COMPONENTS VERIFIED** — the statutory 1/1/2027 uprating REVISED to ~+2.6%; the 'personal difference' offset 50% in 2026, fully abolished from 2027 (~671,586 pensioners); the annual benefit €250→€300 (Nov 2026, +420,000); and the widow/Katrougalos survivor-pension cut PERMANENTLY abolished (~120,000). The **τεκμῆρια** ~30% cut is already legislated (Law 5246/2025) — the fiscal-recycling channel our flagship carries as +0.2-0.3pp upside optionality.
- **THE HANDOUT BIDDING WAR** — PASOK/Androulakis (13 Jul) presented a fully-costed 17-measure pension package (phased 13th-pension restoration + a new EKAS; net ~€1.25-1.3bn); the government counters the 13th pension 'costs €2.5bn per the ΗΑΙΟΣ report'. Tsipras/ELAS a top-1% 'patriotic contribution'. The PM brands them 'τζίμπα 1 & 2' — the framing keeps the fight on the government's pocketbook ground.
- The 'isolated ND' line — we reject it. The opposition-leaning press reads sub-30 house prints as 'no dividend'; but the leader-ratings (Mitsotakis the clear top-PM) and a 17-yr-high bourse + ratings upgrades cut the other way. Our formed view: evident economic success is a latent, compounding ND asset — cost-of-living (govt disapproval ~68.6%) the near-term cap, the autumn ΔΕΘ the conversion lever.

ROLE / LABEL CORRECTIONS

- Cabinet roles: Pierrakakis = Minister of National Economy & Finance; Hatzidakis = Deputy PM; Kerameos = Labour Minister. The PM's attack line is 'τζίμπα 1 / τζίμπα 2'. Tsipras's party is ELAS (Ελληνικό Αριστερό Συμπάγκταξη), launched 26 May.

SIGNPOSTS · WHAT WOULD MOVE THE SCENARIO WEIGHTS

ND level [~30 = FLOOR, but capped] — 2023: polled ~30, TOOK 40.6 (shy-ND / late useful-vote); the estimate under-reads — BUT cost-of-living anger (govt disapproval ~68.6%) caps the upside

Base case [ND-LED government (2 routes)] — resolves via (i) the reinforced-PR REPEAT consolidating the shy-ND useful vote (2023 template) AND/OR (ii) a post-round-1 PASOK SPLINTER — NOT a static whole-PASOK coalition

Whole-PASOK tie-up [RULED OUT pre-election] — Androulakis 'no coalition with ND'; ND 'no cooperation' → the realistic path is a POST-round-1 splinter, not the whole party

SYRIZA [COLLAPSING (~1-2%)] — the non-Tsipras left home is vanishing → consolidates ELAS #2, wastes anti-ELAS vote sub-3%, LOWERS ND's bar to 151

Samaras party [REJECTED (~79% against); Sept launch] — just ~1% of ND voters back it; internal ~10% vs public 2.5-4.2%; the right-flank threat is capped, keeping ND's floor intact

ΔΕΘ fiscal war [~€1.5-2bn govt vs the opposition's 'τζίμπα'] — the pre-election spending contest is the CONVERSION mechanism for the latent dividend; the market-relevant give-back is the **τεκμῆρια** / deemed-income cut

Supply overhang (the driver) [heavy pipeline VOLUME vs thin summer demand = consolidation] — Credia 16.7% block, ELHA ~€250m SCI, GEK Terna €659m, Lamda €350m bond — issuance outrunning demand caps the banks. ELHA's €4.20 range-bottom pricing (~8-10% disc.) is routine (offerings price at a discount to lure investors), not a signal; the paper broadens the float to FRESH HANDS (constructive), not a de-rating

What it means [near-term consolidation + a fresh base forming] — supply + summer thinness cap the tape now; the ownership broadening + H1 bank results (29-31 Jul, NII-guidance lifts) seed the next leg. Discounted supply (ELHA €4.20) = the entry, not the exit

INDIRECT READ-THROUGHS

Greek Banks & Subordinated Credit: GRC-BONDS The Greek 10Y held ~3.7%, Greek duration steady as Monday's US AI-momentum whipsaw (a flat S&P; masking a violent factor reversal) left GGBs unmoved. Sovereign spreads (~65bp to Bund, derived) confirm the recent equity softness was supply/technical, not macro-credit.

Greek Tourism, Transport & Telecom: AIA.AT +1.27% to €10.39 (prev €10.26) — the airport concession firmer with the tape; the regulated cash flows remain the defensive anchor.

Six parallel research scans across the named sources for the 24–72h window prior to July 24, 2026. **Direct** = company-specific catalyst (results, capital action, deal, regulatory). **Indirect** = sector or macro read-through. Headlines paraphrased into Delphic voice; original wording held in the build artifact. Where no material catalyst was found we note 'quiet session' rather than inventing news.
