Daily distillation of the Greek-press cycle — July 31, 2026

The read (on Thursday 30 Jul's close): the **H1 BANK SEASON IS DELIVERING RECORDS ACROSS THE BOARD** — and the **ATHEX** has printed a **17-YEAR HIGH (2,571.90, +1.25%)**, the **banking index +1.78%**. The demand-side proof is now IN: **Eurobank** reported adj. net profit **€776m** (H1), core operating profit €952m (+10%), RoTBV **16.6%** and **RAISED** FY RoTBV guidance to ~17%; **NBG PAT €661m**, EPS €1.45 (+3%), RoTE 15.5%, NII €1,096m — both **BEAT** and both raised guidance (Eurobank the stronger). That follows **Piraeus's record €617m + the €2.0bn NII upgrade** (Tue), and **Alpha reports TODAY (31 Jul)** to close the cluster. The market is rewarding it — a 17-year high — proving the NII-durability / re-rating thesis even against the global cross-currents. Those cross-currents turned **FRIENDLIER**: the US **rebounded hard 30 Jul** (S&P +1.66% on MSFT's AI blowout — the AI-capex verdict came back positive), and **Iran is DE-ESCALATING** (a ceasefire proposed, the first tankers moving, Brent falling to ~\$87) — the risk-off overhang of the FOMC/Iran is easing. The remaining watch is the hawkish Fed (a **HELD-but-9-3** hawkish hold, cuts off the table) + sticky US inflation. Politics stays commanding for ND (Marc >30%, +14pt lead). See the monitor overleaf.

SYNTHESIS · STRATEGIC READ

The strategic read — Athens holds above 2,500 on a bank-led advance, but a hostile global tape (hawkish FOMC + a semis rout) now caps the high-beta upside into H1 results.

- **(i) The H1 catalyst has ARRIVED — Piraeus opens with a RECORD (29 Jul).** After a quietly firm 28 Jul close (+0.13% to ~2,521, Alpha +2.56% the bank leader), the demand-side proof landed TODAY: **Piraeus H1 net profit €617m**, Q2 €336m (+22%), RoTBV 16%, EPS €0.47, total capital 18.6%, and the FY NII target **UPGRADED to €2.0bn** — a clean beat that validates the NII-durability / re-rating thesis. Eurobank + NBG follow 30 Jul, Alpha 31 Jul. This is the medium-term anchor against a near-term hostile tape (the FOMC today + the re-armed Iran risk).
- **(ii) The oil trade has INVERTED — refiners now the give-back.** As the war premium unwinds (Brent ~\$88, the strike pause holding), the refiners are the give-back trade: **Motor Oil -1.23%** off its record on 27 Jul, HELLENiQ +0.48% steady — while the **rate-sensitive banks LED** (Alpha +3.83%, NBG +2.17%) as the oil-inflation fear eased. The mirror of last week: the banks are the beneficiary of the easing inflation impulse, the oil-beta names the funding source. The re-rating is intact but now meets a hostile global tape (a hawkish Fed + a semis rout).
- **(iii) Aktor's €650m SCI PRICED — orderly, on deep demand.** The year's largest ATHEX raise priced at **€11.25** (the range cut from a €13.52 ceiling to €11.25-12); the listed share fell ~14% (13.02 -> 11.72) converging on the clearing price — an ORDERLY ex-rights dilution, NOT distress: demand ran **3.5-4x / €2.3bn** (Blackstone, BlackRock, Mystakidis, Melissanidis), €650m raised (no upside), 57.78m new shares list 28 Jul, a €300m bond leg alongside (~€1bn for the ~€3bn 2026-31 plan). The size cleared to top-tier foreign institutions — the deepening-capital-market thesis, at a cyclical price.
- **Net (Delphic view):** the medium-term re-rating is now PROVEN, not just priced — Piraeus's record H1 + the €2.0bn NII upgrade is the demand-side evidence under the bank thesis, and Athens holds above 2,500. The swing is near-term and EXTERNAL: the FOMC decision today (a hold base case, a hike minority live) and the re-armed Iran risk (the strike pause fractured, oil firming) are a risk-off overhang for the high-beta names — but the Greek banks now trade their own numbers, and those numbers are records. Watch the 30-31 Jul prints (Eurobank/NBG/Alpha) confirm the read.
- **(iv) Politics — both threads still cut the government's way.** Mitsotakis will roll the ND pre-election programme at the September ΔΕΘ (aimed at spring 2027) with a >€2bn TIF package; the EPPO OPEKEPE probe stays BOUNDED (22 suspects incl. 4 sitting ND MPs charged 16 Jul; no new procedural vote, no cabinet/PM reach). The newest poll — Interview (21 Jul, raw) ND 26.8 / ELAS 15.8 / PASOK 10.1, ND +11 — keeps ND in the high-20s cluster; base case an ND-LED government.

CATALYST WATCH

ADDITIONAL SIGNALS (not in the read above)

- Corporate — the energy-infrastructure consolidation rolls on regardless: Aktor's 50% Dioryga Gas FSRU deal (~€400m); the VOAK/Diktaean structure (GEK Terna / Aktor / Metlen); the EU-cleared DEI-Metlen ~1.5 GW storage JV. Analyst PTs firming (Axia: Piraeus €10.60; Optima: HELLENiQ Buy €12.90; Pantelakis: Motor Oil €51.20) — a discount-to-peers story into H1 results.
- Politics — the autumn roadmap: a ~€1.5-2bn September ΔΕΘ package + a fresh 5-part housing package (14 Jul). GPO (13 Jul) likely the LAST clean read before the August blackout.

Into the week

- Corporate — AKTOR's €650m SCI is the week's MAJOR event: the book was covered in ~30 minutes Monday (foreign-institution-led) — watch the FINAL pricing, a probable UPSIZE, and the €300m bond leg of the ~€1bn / ~€3bn-plan raise. ELHA's ~€250m SCI results are due 21 Jul (new shares list 22 Jul). Lamda redeems its old €320m bond 21 Jul. The read on primary DEPTH: Aktor's 30-min coverage says demand is absorbing the pipeline.
- Markets — whether the consolidation deepens or bases: watch the supply pipeline clear and whether fresh hands hold the discounted stock through the global risk-off; the H1 bank-results cluster (29-31 Jul, NII-guidance lifts) is the demand-side catalyst to break the range.
- US — the AI/momentum de-rating climbed the quality ladder (a mega-cap leader cracking, Google -4.4%; semis down again, Micron -5.7%, AMD -5.3%; the S&P; -0.5% to ~7,507); the GGB and Greek duration lean on the US rate path — watch the bank-earnings run and Fed messaging.
- Politics — ~50% expect early elections; GPO (13 Jul) likely the LAST major clean read before the August blackout. Watch the pre-ΔΕΘ bidding war (govt ~€1.5-2bn vs the opposition's 'τζ■μπα 1 & 2') and any Samaras-launch signal (expected early Sept).
- Foreign — the F-35 / Turkey file: an S-400 sale to a Gulf buyer remains UNCONFIRMED. The live front is the US Congress fight (Rep. Titus's House letter opposing F-35 to Turkey) after the Trump-Erdo■an Ankara summit. A real but slow tail (Greek F-35s from late 2028).

Politics — the 2027 election-cycle watch

POLITICAL MONITOR · GREECE 2027 CYCLE

The field keeps consolidating around ND vs a Tsipras-led #2 — our own view, not the papers'. Newest print GPO (13 Jul): ND 29.3, ELAS 16.6, PASOK 10.8, Greek Solution 9.1, KKE 9.1, Elpida (Karystianou) 7.0 — a ~13-pt ND lead, government disapproval ~68.6% the cost-of-living cap. It slots into the ~29-30 cluster and confirms the SHAPE — **ELAS a clear #2, SYRIZA collapsed (~1-2), the anti-ELAS left fragmenting. We form the view: the 'ND bled 10 points' reflex is too quick — in 2023 ND polled ~30 and TOOK 40.6% (shy-ND + late useful-vote), so high-20s/30 is a FLOOR and much of the 'missing' is parked-undecided that reverts. The left's fragmentation empties the anti-ELAS home — consolidating Tsipras #2, wasting left vote sub-3%, LOWERING ND's bar to 151. **Base case unchanged: an ND-LED government**, via the reinforced-PR repeat consolidating the shy-ND vote (2023 template) and/or a post-round-1 PASOK splinter — not a static whole-PASOK tie-up (ruled out by both sides). The genuine risk is if neither fires. Watch: ND off its floor, the ELAS-PASOK gap, SYRIZA's crunch, the Samaras-party question (rejected by ~79% of voters; launch expected early Sept).**

VOTE INTENTION — LATEST PRINTS (% ESTIMATE / εκτίμηση)

Figures are the ESTIMATED outcome (εκτίμηση / undecided-allocated). MRB (9 Jul, semi-annual): the εκτίμηση is ND 29.0 / ELAS 17.6 / PASOK 11.1 (the RAW πρῶτη is ND 23.8 / ELAS 14.4 — a 9.4-pt gap that widens to 11.4 on the estimate); Prorata publishes RAW only and is excluded. Houses diverge on the ND topline (Alco ~25 vs Pulse/Metron/MRB/MARC ~29-30) but AGREE the structure: **ELAS a clear #2** (~15-18), PASOK contesting #3 (~10-12), **SYRIZA collapsed** (~1-2). SEAT estimate at ~30% ND ~120 (short of 151) → a coalition/route-to-majority required. 2023 result for reference: ND 40.6, PASOK 11.8, KKE 7.7. Series: geopolitics/greece-2027/inputs/polling.yaml.

TOP SIGNALS · 27-29 JUL

- **H1 BANK SEASON — RECORDS ACROSS THE BOARD, ATHEX A 17-YEAR HIGH:** the demand-side proof is IN. **Piraeus €617m** (Tue, +€2.0bn NII upgrade); **Eurobank adj. net €776m**, core op €952m (+10%), RoTBV **16.6%**, FY RoTBV guidance raised to ~17% (30 Jul); **NBG PAT €661m**, EPS €1.45 (+3%), RoTE 15.5%, NII €1,096m (30 Jul) — all BEAT, all raised guidance (Eurobank the strongest). **Alpha reports TODAY (31 Jul)** to close the cluster. The ATHEX printed a 17-yr high (2,571.90, +1.25%; banking index +1.78%) rewarding it — the NII-durability / re-rating thesis PROVEN, not just priced.
- **THE GLOBAL CROSS-CURRENTS TURNED FRIENDLIER** — the risk-off overhang is easing: the US **rebounded hard 30 Jul** (S&P; +1.66% on MSFT's AI blowout — the semis-rout narrative reversed) and **IRAN is DE-ESCALATING** (a ceasefire proposed, the first tankers moving, Brent ~\$87). The one caution is the hawkish Fed (a 9-3 hold, cuts off the table). Aktor's post-SCI line settled ~€9.70 ex-rights (mechanical, not distress).
- **MITOTAKIS RULES OUT EARLY ELECTIONS (OPEN TV, 24 Jul)** — the PM explicitly killed the autumn/early-election talk, fixing the clock at the full term (spring 2027) and staking the government on the September ΔΕΘ package (a limited, fiscally-constrained handout round); he also ruled out any rapprochement with Samaras. Reads as a government going on the front foot into the autumn, not managing toward an early ballot.
- **THE WEEK'S ROUND TRIP** — Athens rallied to 2,506.79 (22 Jul, near a 17-yr high, bank-led), REVERSED to 2,456.16 (-2.02%, 23 Jul) as Brent broke \$100, then BOUNCED to **2,492.71 (+1.49%, 24 Jul)** as oil pared off \$100 and Europe turned green — the banks led both the drop and the recovery (banking index +2.35% Friday). Net week +1.85%: the oil tape, not the domestic story, drove the chop; the H1 bank results (29-31 Jul) are the medium-term re-anchor.
- **AKTOR €650m SCI PRICED at €11.25** — the range CUT from a €13.52 ceiling to €11.25-12; the listed share fell ~14% (€13.02 → €11.72) converging on the clearing price. But ORDERLY, not distress: demand ran 3.5-4x / €2.3bn (Blackstone, BlackRock, Mystakidis, Melissanidis), €650m raised (NO upside), 57.78m new shares list 28 Jul, a €300m bond leg alongside (~€1bn for the ~€3bn 2026-31 plan).
- **NEWEST POLL** — Interview (published 21 Jul) supersedes GPO: **ND 26.8, ELAS/Tsipras 15.8, PASOK 10.1**, Greek Solution 8.9, KKE 5.9, Elpida/Karystianou 5.3, MeRA25 3.1, Pleafsi 2.9 — ND +11. CAVEAT: Interview's figures are πρῶτη ψήφου (RAW vote-intention); no separate εκτίμηση table was published, so do NOT read these as the allocated estimate (which typically widens the ND lead).
- **MITOTAKIS' 20 JUL PARLIAMENTARY-GROUP SPEECH** — the PM fixed the electoral clock at **spring 2027** (killing the early-election talk for now), framed the ΔΕΘ/TIF as a 'credibility test', mounted a **full defence of the four OPEKEPE-charged MPs** (claiming vindication and 'no cover-up'), and hammered PASOK and Tsipras. Reads as a government going on the front foot, not managing a scandal.
- **OPEKEPE / EPPO — SHARPER IN SPECIFICITY, STILL BOUNDED IN SCOPE.** The 16 Jul EPPO indictment named **22 suspects, incl. four sitting ND MPs (Skrekas, Papakosta, Boukoros, Senetakis) + a former minister**; but **7 of 11 immunity requests were archived**, the offences **prescribe in September**, and there is **no cabinet/PM reach**. The opposition (20 Jul) escalated the rhetoric — PASOK calls it a 'blue (γαλάνζιο) scandal', SYRIZA/KKE 'αριστερά στην ανευθυνότητα' — but the legal perimeter has not widened toward the government. Our read: bounded, as pre-sold.

- **GOVERNMENT U-TURN (20 Jul)** — the MP/minister incompatibility (ασυμβατότητα) proposal was SHELVED, a small tactical retreat under opposition pressure; a process concession, not a substantive one.
- **ΔΕΘ/TIF PACKAGE SHARPENED** to ~€2bn — child benefit +30%, τεκμαρτο/προκαταβολή (deemed-income / advance-tax) cuts, abolition of the τέλος επιτηδεύματος (trade levy), and pensioner support; amount + mix now firmer, locked for the early-September Thessaloniki Fair speech (with the election-timing signal expected the same day).
- **GPO (13 Jul, for iefimerida)** remains the NEWEST print — ND 29.3, ELAS 16.6, PASOK 10.8, Greek Solution 9.1, KKE 9.1, Elpida 7.0; government disapproval ~68.6%. Likely the LAST major clean read before the August blackout. Corroborates the ND floor (~29-30) and the SHAPE (ELAS #2, SYRIZA collapsed); Mitsotakis the clear top-PM.
- **MRB (9 Jul, the semi-annual wave)** corroborates the dipole — εκτίμηση ND 29.0 / ELAS 17.6 / PASOK 11.1 / Elpida 8.8 / Greek Solution 8.7 / KKE 7.3, an 11.4-pt ND lead (the RAW πίεση is ND 23.8 / ELAS 14.4). The headline reads: 69.5% want a change of government, yet Mitsotakis is the most-suitable-PM, and 64% would NOT vote a Samaras party. 'ND and ELAS form a new dipole', PASOK third, Karystiannou's Elpida fourth.
- **ΔΕΘ PACKAGE SIZE DRIFTING UP** — the '€1bn' is now the floor; the economic team (Pierrakakis, Nat. Economy & Finance) sees room for €1.5-2bn (iefimerida frames overall ~€2bn, doubled from last year's €1.76bn); amount + mix 'still being finalised', announced at the Thessaloniki Fair 5-6 Sept with an election-date signal expected the same speech.
- **PENSION COMPONENTS VERIFIED** — the statutory 1/1/2027 uprating REVISED to ~+2.6%; the 'personal difference' offset 50% in 2026, fully abolished from 2027 (~671,586 pensioners); the annual benefit €250→€300 (Nov 2026, +420,000); and the widow/Katrougalos survivor-pension cut PERMANENTLY abolished (~120,000). The τεκμαρτο ~30% cut is already legislated (Law 5246/2025) — the fiscal-recycling channel our flagship carries as +0.2-0.3pp upside optionality.
- **THE HANDOUT BIDDING WAR** — PASOK/Androulakis (13 Jul) presented a fully-costed 17-measure pension package (phased 13th-pension restoration + a new EKAS; net ~€1.25-1.3bn); the government counters the 13th pension 'costs €2.5bn per the ΗΑΙΟΣ report'. Tsipras/ELAS a top-1% 'patriotic contribution'. The PM brands them 'τζούμπα 1 & 2' — the framing keeps the fight on the government's pocketbook ground.
- The 'isolated ND' line — we reject it. The opposition-leaning press reads sub-30 house prints as 'no dividend'; but the leader-ratings (Mitsotakis the clear top-PM) and a 17-yr-high bourse + ratings upgrades cut the other way. Our formed view: evident economic success is a latent, compounding ND asset — cost-of-living (govt disapproval ~68.6%) the near-term cap, the autumn ΔΕΘ the conversion lever.

ROLE / LABEL CORRECTIONS

- Cabinet roles: Pierrakakis = Minister of National Economy & Finance; Hatzidakis = Deputy PM; Kerameos = Labour Minister. The PM's attack line is 'τζούμπα 1 / τζούμπα 2'. Tsipras's party is ELAS (Ελληνική Αριστερή Συμπαράταξη), launched 26 May.

SIGNPOSTS · WHAT WOULD MOVE THE SCENARIO WEIGHTS

ND level [~30 = FLOOR, but capped] — 2023: polled ~30, TOOK 40.6 (shy-ND / late useful-vote); the estimate under-reads — BUT cost-of-living anger (govt disapproval ~68.6%) caps the upside

Base case [ND-LED government (2 routes)] — resolves via (i) the reinforced-PR REPEAT consolidating the shy-ND useful vote (2023 template) AND/OR (ii) a post-round-1 PASOK SPLINTER — NOT a static whole-PASOK coalition

Whole-PASOK tie-up [RULED OUT pre-election] — Androulakis 'no coalition with ND'; ND 'no cooperation' → the realistic path is a POST-round-1 splinter, not the whole party

SYRIZA [COLLAPSING (~1-2%)] — the non-Tsipras left home is vanishing → consolidates ELAS #2, wastes anti-ELAS vote sub-3%, LOWERS ND's bar to 151

Samaras party [REJECTED (~79% against); Sept launch] — just ~1% of ND voters back it; internal ~10% vs public 2.5-4.2%; the right-flank threat is capped, keeping ND's floor intact

ΔΕΘ fiscal war [~€1.5-2bn govt vs the opposition's 'τζούμπα'] — the pre-election spending contest is the CONVERSION mechanism for the latent dividend; the market-relevant give-back is the τεκμαρτο / deemed-income cut

Supply overhang (the driver) [heavy pipeline VOLUME vs thin summer demand = consolidation] — Credia 16.7% block, ELHA ~€250m SCI, GEK Terna €659m, Lamda €350m bond — issuance outrunning demand caps the banks. ELHA's €4.20 range-bottom pricing (~8-10% disc.) is routine (offerings price at a discount to lure investors), not a signal; the paper broadens the float to FRESH HANDS (constructive), not a de-rating

What it means [near-term consolidation + a fresh base forming] — supply + summer thinness cap the tape now; the ownership broadening + H1 bank results (29-31 Jul, NII-guidance lifts) seed the next leg. Discounted supply (ELHA €4.20) = the entry, not the exit

INDIRECT READ-THROUGHS

Greek Banks & Subordinated Credit: GRC-BONDS The Greek 10Y ~3.84% (spread ~70bp to Bund), steady on 27 Jul; Fitch keeps Greece BBB (investment grade) — the sovereign backdrop underpinning the bank re-rating intact. The wider spread is the ECB-path read-through, not a Greece-specific credit signal.

Greek Tourism, Transport & Telecom: AIA.AT +1.36% to €10.41 (prev €10.27) — the airport concession firmer on 27 Jul; the regulated cash flows remain the defensive anchor.
